REMOVAL

1. Remove the rear disc brake caliper. **NOTE:** When removing the rear disc brake caliper in this procedure, it is not necessary to disconnect the rear wheel brake hose.

![Diagram](GH0625-A)

2. Remove the rear disc brake rotor.

1 Remove the press-on keeper nuts, if so equipped.
2 Remove the rear disc brake rotor.

**NOTE:** If the rear disc brake rotor binds on the parking brake shoe and lining, remove the adjustment hole access plug and contract the parking brake shoe and lining.

![Diagram](GH1754-A)

3. Inspect the rear disc brake rotor.
• Replace the rear disc brake rotor if not within specification.

INSTALLATION

1. Install the rear disc brake rotors
2. Install the rear disc brake caliper.
