Power Seat Control Module: Service and Repair

Replacing Power Seat Control Module With Memory

1. Remove front seat

   **NOTE:** Disconnect electrical leads and pneumatic lines

2. Pull off connectors (5 to 10)

   **NOTE:** Open cover (3) above connector strip

3. Unscrew Torx socket bolts (1)

4. Unclip clip (2) from seat subframe and remove left front ESA control module (with memory) (N32/1) or right front ESA control module (with memory) (N32/2)

5. Reinstall in opposite order

6. Check for proper function
