

# Know Your Cooker

# Control Panel

## Operating controls when the grill is in use

In common with all cookers having controls sited above the grill compartment, care must be taken when setting the controls, due to the hot air expelled from the grill compartment.

## Cooling fan

A gentle flow of air will be blown below the control panel when grill / oven controls are in use.

## Main and Top oven lights

The oven lights will illuminate when the appropriate oven controls are operated. The light will remain on during the cooking period.
