Removal/Installation

CAUTION: When prying with a flat tip screwdriver, wrap it with protective tape to prevent damage.

NOTE:
- Take care not to bend and scratch the headliner.
- Be careful not to damage the dashboard and other interior trim.

1. Remove:
   - Door sill molding (both sides, see page 20-40)
   - Door trim (both sides, see page 20-40)
   - Front pillar trim (both sides, see page 20-40)
   - Rear seat cushion and rear seat-back (see page 20-59)
   - Side trim panel (both sides, see page 20-40)
   - Front seat belt upper anchor (both sides, see section 24)
   - Quarter window trim and quarter trim panel (see page 20-40)
   - Rearview mirror (see page 20-13)
   - Spotlight and ceiling light (see section 23)

2. Remove the sunvisor and holder from each side. Disconnect both positive terminals.

3. Remove the grab handle and coat hanger.

4. Remove the socket plug.

   Remove the socket plug from the frame by turning it 90°
5. Remove the roof trim, detach the clips, then remove the headliner.

NOTE: Take care not to damage the rear window antenna terminal.

6. Carefully remove the ceiling light harness from the headliner.

NOTE:
- Take care not to damage the headliner and ceiling light harness.
- Use a razor blade or sharp knife to carefully cut the cushions that secure the ceiling light harness.

7. Remove the headliner through the passenger's door opening.

8. Installation is the reverse of the removal procedure.

NOTE:
- When inserting the headliner through the door opening, be careful not to fold or bend it. Also, be careful not to scratch the body.
- When installing the ceiling light harness on the headliner, fasten it securely with the cushion tape as shown.

- Check that both sides of the headliner are securely attached to the trim and panels.
- When installing the roof trim, install the joint toward the rear.
