

Viewing Information

Use the Information screen to access information about dashboard gauges, tides, currents, user data, and other vessels.

Viewing a Compass

From the Home screen, select **Information > Dashboard > Compass**.

Viewing Numbers

You can view and customize numerical data including depth, GPS information, and navigation information. You can customize the number of fields shown and the type of information shown in each field. You can view up to six fields of numerical information.

To view the Numbers screen from the Home screen, select **Information > Dashboard > Numbers**.

Depth	50.8 _m	
Position	N 25°33.001' W080°16.903'	
GPS Heading	348 _M	GPS Speed
		2.4 _k _h

To customize the Numbers screen:

1. From the Home screen, select **Information > Dashboard > Numbers**.
2. Press **MENU** and select **Configure**.

3. Select the number of fields to show (3, 4, 5, or 6).
4. Select information to show in each field.

Trip Odometer	244^{mi}	Stopped Time	01:48
Moving Average	3.7%	Moving Time	03:59
Total Average	0.1%	Total Time	01:52
Maximum Speed	26.5%	Odometer	244^{mi}
Trip Fuel Used		0.0L	

To reset the trip information, maximum speed, odometer, or all values, press **MENU** while viewing the trip information.

Viewing Fuel Gauges

To view fuel gauges from the Home screen, select **Information** > **Dashboard** > **Fuel**. Fuel level in each tank, total fuel remaining, cruising range, fuel flow for each engine, total fuel flow, fuel economy for each tank, and total fuel economy are displayed.

NOTE: To view fuel information, your unit must be connected to an external fuel sensor, such as the Garmin GFS™ 10.

Viewing Trip Information

From the home screen, select **Information** > **Dashboard** > **Trip**.
